

Colorado

2019 Rebate Summary

CO Residential Energy Efficiency Programs

| | Rebate area | Qualifiers | Rebate | | More information |
|---|--|--------------------------------|--------------------------------|-------------------------------|---|
| Key | Cooling | | | | |
|  | Evaporative coolers | Standard cooler | Non-replacement Replacement | \$400 \$200 | Rebate can't be more than total cost |
| | | Premium cooler | Non-replacement Replacement | \$800 \$600 | Non-replacement cooler rebate is only available if additional equipment is listed on invoice such as supports, diffusers, ducting, roof jack, etc. |
| | | Multi-ducted premium cooler | Non-replacement Replacement | \$1,200 ¹ \$600 | ¹ Premium unit with 3 ducts or more, and at least one of them new, are needed to qualify for the \$1200 rebate |
|  | Standard efficiency AC/ASHP with Quality Installation (QI) | Under 15 SEER and 12.5 EER | \$300 | | The rebate is paid according to the lesser value of the SEER/EER. Example: A system with 16 SEER and 12 EER will receive a \$300 rebate. |
| | High efficiency AC/ASHP with Quality Installation (QI) | 15+ SEER and 12.5+ EER | \$600 | | New, matched indoor and outdoor components, a TXV, and an AHRI certificate are required. SEER = Seasonal Energy Efficiency Ratio EER = Energy Efficiency Ratio AC = Air Conditioner ASHP = Air Source Heat Pump |
|  | Ductless mini-split heat pumps | 15+ SEER, 11+ EER, 9+ HSPF | Maximum rebate | \$300 | AHRI certificate required. HSPF = Heating Seasonal Performance Factor |
|  | Ground source heat pumps | Minimum 3.3 COP and 14.1 EER | Maximum rebate | \$300 per heating ton | ENERGY STAR [®] qualified, closed-loop systems. AHRI certificate required. |
| Key | Heating | | | | |
|  | Furnaces | 95% AFUE | \$300 | | Only new furnaces located on ahridirectory.org qualifies for a rebate |
|  | Electronically Commutated Motors (ECM) | ECM in new or existing furnace | \$100 | | Customers must have electric service to qualify for the ECM rebate, and gas service to qualify for the furnace rebate. Qualifying customers may receive both a furnace and an ECM rebate |
| Key | Water heating | | | | |
|  | Storage tank (medium draw) | 0.64 UEF | \$70 | | Only new equipment located on energystar.gov or ahridirectory.org qualifies for a rebate |
| | Storage tank (high draw) | 0.68 UEF | \$70 | | |
|  | Tankless | 0.87 UEF | \$100 | | |
|  | Electric heat pump | | | \$450 | |

| | Rebate area | | Qualifiers and associated rebates | | |
|---|---|-----------------------|---------------------------------------|--|--------------------------------|
| Key | Air sealing and insulation | | | | |
| | | | Natural gas heating, no AC cooling | Natural gas heating with AC cooling | Electric resistance heating |
|  | Air sealing, bypass sealing, weather stripping (60% up to cap) | 20% leakage reduction | \$175 | \$300 | \$350 |
| | | 30% leakage reduction | \$250 | \$400 | \$450 |
| | Attic insulation (30% up to cap) | | \$350 | \$500 | \$600 |
| | External wall insulation, above grade (30% up to cap) | | \$350 | \$500 | \$600 |

| | Rebate area | Rebate | More information |
|---|-------------------|--------|------------------------------|
| Key | Home energy audit | | |
|    | Infrared audit | \$200 | 60% of the cost, up to \$200 |
|    | Blower door audit | \$160 | 60% of the cost, up to \$160 |
|    | Standard audit | \$100 | 60% of the cost, up to \$100 |

Home performance with ENERGY STAR®

**Begin with an advanced Home Energy Audit.** Bundle three or more energy efficiency improvements with Home Performance with ENERGY STAR.

Natural gas service customers without Xcel Energy electric service do not qualify for this rebate program. Customers should specify that they want the higher, bundled rebates before any work is performed by a contractor. Customers applying for Home Performance rebates cannot receive other Xcel Energy rebates for the same improvements.

| Home improvement measures | Rebates for home performance measures | | | |
|---|--|-------|-------------------------------------|-----------------------------|
| Top three REQUIRED improvements (If listed as a recommendation in the customer’s audit report) | Natural gas heating, no AC cooling | | Natural gas heating with AC cooling | Electric resistance heating |
| Supplemental upgrades (choose one): <input type="checkbox"/> Home Energy Squad <input type="checkbox"/> LED bulbs <input type="checkbox"/> Water saving showerheads or aerators | Visit Xcelenergystore.com for instant rebates on LED bulbs, water saving measures or to sign up for the Home Energy Squad. | | | |
| Air sealing, bypass sealing and weather stripping (60% up to cap) | 20% leakage reduction | \$250 | \$400 | \$450 |
| | 30% leakage reduction | \$325 | \$500 | \$550 |
| Attic Insulation (30% up to cap) | | \$400 | \$600 | \$700 |
| Optional improvements | Rebates | | | |
| Wall insulation, above grade (30% up to cap) | | \$450 | \$600 | \$700 |
| Evaporative cooling – standard cooler (non-replacement) | \$325 | | | |
| Evaporative cooling – standard cooler (replacement) | \$225 | | | |
| Evaporative cooling – premium cooler (non-replacement) | \$725 | | | |
| Evaporative cooling – premium cooler (replacement) | \$625 | | | |
| Evaporative cooling – multi-ducted premium cooler (non-replacement) | \$1200 | | | |
| Evaporative cooling – multi-ducted premium cooler (replacement) | \$625 | | | |
| Central AC-15 SEER, 12.5 EER | \$400 | | | |
| Central AC-16 SEER, 13 EER | \$550 | | | |
| Central AC-17 SEER, 13 EER | \$700 | | | |
| Central AC trade-in (with qualifying new equipment) | \$550 | | | |
| Ground source heat pump-Min. 3.3 COP and 14.1 EER | \$300 per heating ton | | | |
| Programmable set back thermostat | \$25 | | | |
| 95% + AFUE furnace | \$400 | | | |
| ECM | \$125 | | | |
| 0.87 UEF + natural gas tankless water heater | \$200 | | | |
| 0.64 UEF + natural gas storage water heater (medium draw) | \$100 | | | |
| 0.68 UEF + natural gas storage water heater (high draw) | \$100 | | | |
| Electric heat pump water heater | \$550 | | | |
| ENERGY STAR refrigerator – primary | \$15 | | | |
| ENERGY STAR clothes washer | \$30 | | | |

KEY:  **Natural Gas:** This symbol indicates a program available to our natural gas customers.

 **Electric:** This symbol indicates a program available to our electric customers.

Participating contractor: This symbol indicates a program that requires customers to use an Xcel Energy participating contractor to install the equipment or make the improvement. Our list of registered contractors can be found at xcelenergy.com/cotrades.

Definition of technical terms:

AFUE= Annual Fuel Utilization Efficiency

COP=Coefficient of Performance

HSPF= Heating Seasonal Performance Factor

UEF=Uniform Energy Factor

AHRI =Air-conditioning, Heating, and Refrigeration

EER= Energy Efficiency Ratio

SEER= Seasonal Energy Efficiency Ratio
